Errata list
Doctorial thesis “Slag formation in fixed bed combustion of phosphorus-poor biomass” by Ida-Linn Näzelius

Page 12 in the thesis: “[ΔG° (kJ)]” should be added after “… thermodynamic stability…” in the caption of Figure 3.

Page 72 and 73 in the thesis: It says “The (short) dotted lines represent limits that need more research to confirm.” in the caption of both Figure 21 and 22. These (short) lines have mistakenly been lost. The outer lines (towards the K₂O-corner and the line connecting CaO and SiO₂) in the triangles should be dotted (please, see below).

Page 2 in Paper V: Fifth line from the end, “CaO” should be “Ca”.

Reference list in Paper VI: Incorrect reference list included in the thesis, the correct one is used in the published version (Energy & Fuels). Should be (please, see next page):
Correct reference list for Paper VI
