

## Errata to the PhD thesis

”Nitrile Hydratases and Epoxide-Transforming Enzymes: Quantum Chemical Modeling of Reaction Mechanisms and Selectivities”

Kathrin H. Hopmann, Stockholm, 2008

- **Scheme 4.6B:** The conformers of limonene-1,2-epoxide are missing a methyl group. The correct Scheme 4.6B is:

- **Scheme 4.8:** An arrow has been displaced in the first step of the reaction mechanism. The correct scheme for this step is:
