THE DAUGHTER-IN-LAW
Identity and Integration within th Indian Families

ANNA LAGERCRANTZ
UMEA SCHOOL OF ARCHITECTURE
BACHELOR PROJECT 2013

A good daughter-in-law helps her mother-in-law with the domestic work and gives birth to the family's children, preferably sons.

The life expectancy is 67 years for women and 64 for men.

The young women that soon will, or have already been married, need a network outside their new families. Knowledge, education and community can make them be more independent and empower them in their new role as a daughter-in-law.
CONCRETE: ground floor
BRICK: upper part of the building
IRON: window grills
CORRUGATED STEEL: roof
TREE: greenery
Heavy material on ground and lighter on the top
